8	2.7 MM CORTEX SCREW, 36 MM HEXAGONAL HEAD

Specification

- Product is available in TT.

Indication for use

- The 2.7 mm Cortex Screw with Hexagonal Head is used for internal fixation of small to medium-sized bone fractures in veterinary orthopaedics. It provides strong cortical engagement and stable compression, suitable for long bones such as the radius, ulna, tibia, and metacarpals/metatarsals.
