1611.535	DRILL BIT 4.5 MM X 125 MM NON - COUPLING WITH STOPPER	SS
1611.760	DRILL BIT 6.0 MM X 225 MM NON - COUPLING WITH STOPPER	SS

**Specification**

- Instruments are available in SS.

**Indication for use**

- The Drill Bit is used to prepare pilot holes in bone during fixation procedures in veterinary surgeries. It ensures accurate screw placement by providing the correct hole size and alignment, facilitating stable fixation of plates, screws, or implants while minimizing bone trauma.
