

FLAT SHO ULDER IMPECTOR 16 MM CAP		
CAT. NO.	PRODUCT DESCRIPTION	MAT.
1573.061	FLAT SHO ULDER IMPECTOR 16 MM CAP FOR VETERINARY THR	SS

## Specification

- Instrument is available in SS.

## Indication for use

- The Flat Shoulder Impactor (16 mm Cap) is a surgical instrument used during Total Hip Replacement (THR) or related orthopaedic procedures for the accurate and secure impaction of trial or final implants. Its flat shoulder design provides stable contact and controlled force transmission to ensure precise seating of the acetabular or femoral components without causing damage to the implant or bone.
