203.040	603.040	CORTICAL SCREWS 2.7 MM SELF TAPPING 40 MM

Specification

- All screws are available in SS & TT.

Indication for use

- Indicated for internal fixation of medium to small bone fractures in veterinary orthopaedic surgeries, especially in small to medium-sized animals. Used with compatible bone plates or as lag screws to provide stable cortical bone fixation in diaphyseal fractures and osteotomy procedures.
