

BENDING IRON		
CAT. NO.	PRODUCT DESCRIPTION	MAT.
1573.012	BENDING IRON FOR VETERINARY SPINE	SS

Specification

- Product is available in SS.

Indication for use

- The Bending Iron is used in veterinary spinal surgeries to contour spinal rods according to the anatomical requirements of the patient. It provides controlled leverage to achieve precise bends without damaging the implant. The instrument ensures proper rod alignment, improving the accuracy and stability of spinal fixation constructs.
