

POLYAXIAL SCREW DRIVER		
CAT. NO.	PRODUCT DESCRIPTION	MAT.
1573.010	POLYAXIAL SCREW DRIVER FOR VETERINARY SPINE	SS

Specification

- Product is available in SS.

Indication for use

- The Polyaxial Screw Driver is used for inserting and securing polyaxial pedicle screws during spinal fixation procedures. It provides controlled engagement with the screw head, allowing multi-directional alignment for accurate placement. The instrument ensures stable handling and efficient transfer of torque while minimizing slippage during implantation.
