

ROD BENDING TEMPLATE		
CAT. NO.	PRODUCT DESCRIPTION	MAT.
1573.006	ROD BENDING TEMPLATE FOR VETERINARY SPINE	SS

Specification

- Product is available in SS.

Indication for use

- The Rod Bending Template is used to pre-shape spinal rods according to the anatomical curvature required for veterinary spinal fixation procedures. It provides a reference pattern that helps achieve accurate rod contouring before implantation. This tool ensures consistent, precise rod alignment and reduces intraoperative adjustment time. Suitable for spinal stabilization surgeries in small and large animals.
